

test\_bstring

test\_findFirstWord

bstring::findFirstWord

```
graph LR; A[test_bstring] --> B[test_findFirstWord]; B --> C[bstring::findFirstWord]
```

The diagram illustrates a sequence of three components connected by arrows. The first component, 'test\_bstring', is enclosed in a gray-shaded rectangular box. An arrow points from this box to the second component, 'test\_findFirstWord', which is in a white rectangular box. Another arrow points from the second box to the third component, 'bstring::findFirstWord', also in a white rectangular box. All boxes have a black border, and the arrows are dark blue.
